

BagitoJobSeeker

Automated Job Application Bot

From job discovery to application — fully automated.

Python

Selenium

Gemini AI

Gmail API

NLP

Mehdi El Akary | mehdyakr@gmail.com | elakarymedhi.dev

The Problem

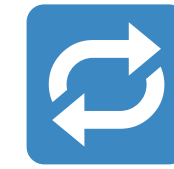

Time-Consuming

Manually browsing and applying to dozens of job boards every day takes hours.

Generic Applications

Copy-pasting the same cover letter kills your chances of standing out.

No Tracking

It's easy to lose track of who you contacted, when, and whether they replied.

The Solution

BagitoJobSeeker handles the entire application pipeline end-to-end.

01

Scrape

LinkedIn posts, Seek & Indeed listings are scraped automatically using Selenium + BeautifulSoup.

02

Match

SentenceTransformers computes cosine similarity between your resume and each job description.

03

Write

Gemini or Meta AI generates a tailored cover letter and cold email for each matched position.

04

Apply

Gmail API sends your resume + cover letter. An applied.json tracker prevents duplicate sends.

Key Features

Multi-Platform Scraping

LinkedIn posts, Seek, Indeed

AI Cover Letters

Gemini 2.5 Flash or Meta AI

Resume Matching

SentenceTransformers + cosine similarity

Email Automation

Gmail API with PDF attachments

Multi-Language

British, American, French spelling variants

Application Tracking

JSON tracker prevents duplicate sends

Tech Stack

AI & NLP

- Gemini 2.5 Flash
- Meta AI API
- SentenceTransformers
- Cosine Similarity

Scraping

- Selenium (Chrome)
- BeautifulSoup
- Apify (optional)
- curl_cffi AsyncSession

Backend

- Python 3.12
- AsyncIO
- ReportLab (PDF)
- dotenv

Integrations

- Gmail API (SMTP)
- Discord Webhook
- Seek GraphQL API
- LinkedIn (Selenium)

How It Works – Demo Flow

1

Run the bot

`python main.py --first_name Mehdi`

2

Scraping begins

LinkedIn + Seek scraped per searchTerms

3

Resume matching

Each job scored vs resume via NLP

4

Cover letter written

Gemini API drafts a personalized letter

5

Email sent

Gmail API sends resume + cover letter PDF

6

Tracked

applied.json logs job ID and timestamp

What This Bot Delivers

- Applies to 20+ positions per run without lifting a finger
- Generates personalized cover letters using your real resume
- Prevents repeat applications with built-in tracking
- Works across LinkedIn, Seek, and Indeed simultaneously
- Rate-limit aware — built-in delays and exponential backoff
